

Red Buckeye

Aesculus pavia

Category: Deciduous

Growth Rate: Moderate

Adaptability: Full sun to part shade

Shape: Small tree with irregular rounded crown

Size: 12-15' tall, 12-15' wide

Flower Color: Bright red to orange red tubular flowers in spring, attractive to hummingbirds

Description: Prefers average, medium moisture, well-drained soil and some afternoon shade in hot summer climates. Foliage tends to scorch and generally depreciate in dry conditions. Smooth, light brown, seed capsules encase 1-3 buckeyes that ripen in the fall. Seeds are poisonous and are avoided by most wildlife.
