

Willow Oak

Quercus phellos

Category: Deciduous

Growth Rate: Moderate to Rapid

Adaptability: Sun; prefers moist well drained soil but will grow in a wide range of soil conditions including compacted soil

Shape: Conical in youth; rounded crown; dense

Size: 50-75' tall, 35-50' wide

Fall Color: Yellow to yellow brown

Description: This native tree is tolerant of heat, drought, air pollution and standing water; acorns are eaten by birds and squirrels; small leaves are easy to clean up in fall. Of the red oak group, is noted for its oak shape, willow-like leaves and relatively fast growth rate.
