

Dawn Redwood

Metasequoia glyptostroboides

Category: Deciduous

Growth Rate: Fast

Adaptability: Full sun

Shape: Pyramidal and upright or erect

Size: 60-90' tall, 20-30' wide

Fall Color: Copper and yellow

Wildlife Value: Provides cover and nesting sites for birds

Description: A good tree for screening. From fossil records, dawn redwood is known to have existed as many as 50 million years ago. Foliage emerges light green in spring, matures to deep green in summer and turns red-bronze in fall. It closely resembles bald cypress and redwood..
