

Royal Star Magnolia

Magnolia stellata

Category: Deciduous

Growth Rate: Slow

Adaptability: Full sun and moist, organically rich, well-drained soils, intolerant of extremes of dryness or wetness

Shape: Pyramidal, multi-stemmed

Size: 15-20' tall, 15-20' wide

Flowers: Fragrant white star-shaped flower

Description: Star-shaped blooms appear in late winter before leaves. Heat tolerant but mulch to help retain soil moisture. Ideal as an accent, specimen, border or foundation planting.
