

# EASTERN REDBUD

*Cercis canadensis*

## Description

It is particularly noted for its stunning pea-like pink-fuchsia flowers which bloom on bare branches in early spring (March-April) before the foliage emerges. Part shade is best in hot summer climates. Grows in average, well-drained soil.

## Information

CATEGORY	Deciduous
GROWTH RATE	Fast
ADAPTABILITY	Full sun to partial shade
SHAPE	Rounded and Vase-shaped
SIZE	20-30' tall, 25-35' wide

## Wildlife value

Flowers attract butterflies, bees, and hummingbirds. Provides habitat for many species. Susceptible to drought. Fall color is yellow.
